

Safe The Humanity (STH)

Whitepaper

The SafeTheHumanity project is a next-generation, community-oriented static rewards & automatic liquidity protocol with a unique focus on charity donations using governance voting.

We support charities through our Donation Fund generated by trade. These funds can be donated to any charity as per voting. We think our strong points are our transparency, strong work ethic and commitment to donate to charities as often as possible. SafeTheHumanity's continuing initiative to help charities across the globe. Imagine what we could achieve in years to come...

4% transaction fee:

- 1% Holders**
- 1% Liquidity**
- 1% Donations**
- 1% Foundation**

Token

Liquidity is automatically generated to create a price floor for the token. The smart contract applies a 1% fee on all transactions to auto refill the liquidity pool.

In addition, a 1% fee on all transactions is distributed to all our token holders. This is to say that you don't need to stake or provide liquidity in order to earn with SafeTheHumanity. **Every holder will benefit!**

A 1% fee will be taken on all transactions to be donated to the agreed upon and voted charitable organization by the community.

- **Total supply:** 1,000,000,000,000,000 STH
 - Burned on launch:** 400,000,000,000,000 STH (40.00 %)
